Confidence in DESIGN

KAREN WELLS DESIGN

Karen Wells Design creates professionally finished, uniquely beautiful interiors. Specialties include interior design, furniture design, interior architecture, project management, space planning, and curating collections. Each project brings a fresh aesthetic based on the client's tastes, idiosyncrasies, and how they want to live. Interpreting each space for its functionality, refining it through the use of color, texture, light, art, and furniture proportions allows KWD to create environments called "home."
